HONOURS AND AWARDS

Certificate of Computer Networking - Wired and Wireless Networks and Protocols

Alison Courses [06/05/2023]

This course gave me a better understanding of what wired and wireless networks are about. I learned the basics of both networks' media, protocols, standards, and concepts. The course helped me tackle cabling systems for wired networks, in particular, the twisted-pair cables. cables and signalling, and other types of cable. The course also showcases me Internet Protocol(IP) addresses in detail, including IP Ranges.

PHP for Beginners

Great Learning [01/05/2023]

I learned about various concepts and features of the language. Here's a summary of the key topics you covered:

PHP as a server-side scripting language: A widely-used, open-source scripting language that allows web developers to create dynamic content and interact with databases.

  • PHP syntax: PHP scripts are embedded in HTML using tags <?php ?>. The language is designed to be easy to learn and use, with a syntax similar to HTML.
  • I learned about variables, their scope, and how to use them in PHP. Variables in PHP can be used to store data, perform calculations, and more.

HOBBIES AND INTERESTS

Photography, Cinematography, Cosmology , User Experience.

"I have a deep passion for creating videos and photos that highlight the beauty of various places. Whether it's a city or a serene landscape, I love exploring and sharing these moments through my lens. Additionally, my fascination with the cosmos, nurtured since childhood, adds a cosmic dimensions to my creativity. Studying cosmology and astronomy has always been a hobby, and it inspires me to infuse a sense of wonder and curiosity into my spiritual journey."
